

Call for Papers

Thematic issue of Statistica Applicata – Italian Journal of Applied Statistics on
deadline December 31st, 2022

Recent Advances in Data-driven Statistical Methods

Nowadays, the pervasive usage of data to measure all the relevant aspects of our life (economics, health, social life) makes data modeling particularly important.

This thematic issue seeks applied and methodological papers addressing challenging problems using new statistical or machine learning methods or decision analytics. Papers dealing with the analysis of large volumes of data (structured and unstructured) with the goal of ensuring a high level of data reliability are also welcomed.

Methodological and empirical papers related to the following types of application fields are particularly appreciated:

Application domains

- Economics
- Business
- Health
- Sociology
- Environment
- Policy
- Engineering

This call addresses to all the works and research presented at the Italian Statistical Conference 2022 (SIS2022) held in Caserta but remains open to anyone else interested. Submitted articles must not have been previously published or currently submitted for journal publication elsewhere. Publication of a preliminary version of your article in the SIS conference proceedings is fine.

Guest Editors

Ana María Aguilera del Pino, University of Granada, Spain, aaguiler@ugr.es

Maria Gabriella Grassia, University of Naples Federico II, Italy, mgrassia@unina.it

Caterina Liberati, University of Milan Bicocca, Italy, caterina.liberati@unimib.it

Papers should be submitted online and formatted according to the Statistica Applicata -Italian Journal of Applied Statistics at: <https://www.sa-ijas.org/ojs/index.php/sa-ijas/about/submissions> All submitted manuscripts will be peer-reviewed, and they are expected to adhere to the Journal's standards. Authors are required to follow the specifications in the "Authors' Guidelines".

During the submission procedure, specify in the field "Comments for the editor": Thematic issue on "Recent advances in data-driven and applied statistic."
